

Coverage of any medical intervention discussed in a Prevea360 Health Plan medical policy is subject to the limitations and exclusions outlined in the member's benefit certificate or summary plan description (SPD) and to applicable state and/or federal laws.

Corneal Cross-Linking (CXL)

MP9470

Covered Service: Yes

Prior Authorization

Required: No

Additional

Information: None

Prevea360 Health Plan Medical Policy:

- 1.0 Conventional and accelerated corneal Cross-Linking (CXL), which utilizes riboflavin and ultraviolet –A (UVA) to strengthen chemical bonds in the cornea, **does not** require prior authorization and is considered medically necessary for the treatment of keratoconus or corneal ectasia.
- 2.0 Conventional and accelerated Corneal cross-linking is considered experimental and investigational and therefore not medically necessary for all other indications.
- 3.0 Conventional and accelerated corneal cross-linking is considered experimental and investigational, and therefore not medically necessary when performed concurrently with other procedures, also known as CXL-plus, (e.g., intrastromal corneal ring segments [INTACS]) or photorefractive keratectomy or phakic intraocular lens implantation.
- 4.0 Transepithelial and partial epithelium-off corneal cross-linking is considered experimental and investigational, and therefore not covered.

Coverage of any medical intervention discussed in a Prevea360 Health Plan medical policy is subject to the limitations and exclusions outlined in the member's benefit certificate or summary plan description (SPD) and to applicable state and/or federal laws.
